# ABOUT US

Welcome to FAZARA Dental Devices

FAZARA Dental Devices is a trusted global manufacturer of high-precision dental instruments, proudly serving professionals across orthodontics, endodontics, periodontics, implantology, and general dentistry. For over 25 years, we have combined craftsmanship, innovation, and modern production techniques to deliver instruments that meet the highest international standards of performance and reliability.

Based in Sialkot, Pakistan — a city known worldwide for surgical manufacturing excellence — our production facilities are equipped with advanced technologies that support both standard and custom-designed instruments. Using the finest imported raw materials, our skilled technicians ensure accuracy, durability, and comfort in every instrument we produce.

As a second-generation family business, we uphold a legacy built on quality, commitment, and continuous improvement. Our certifications, including ISO 9001:2000, ISO 13485:2003, GMP, and CE, reflect our dedication to maintaining consistent excellence throughout our manufacturing processes.

At FAZARA, we work closely with our customers worldwide — many of whom started with trial orders and developed into long-term partners. We take pride in understanding their needs and delivering solutions that match their expectations for design, quality, delivery, and value.

We invite you to explore our catalog and discover the precision, care, and craftsmanship that define FAZARA Dental Devices.

— Fazara Family

## **Mission, Vision & Core Values**

### **Mission**

To provide dental professionals around the world with high-quality, safe and innovative dental instruments, guaranteeing precision, durability and reliability at every stage.

### **Vision**

To become a trusted and cutting-edge brand in the global dental instruments industry, setting new standards in technology, quality and customer service.

### **Core Values**

#### **1. Quality First**

Ensuring the highest quality with international certification, the best materials, and rigorous testing.

#### **2. Innovation**

Continuously adopting new technologies and modern manufacturing methods, keeping in mind the needs of the future.

#### **3. Craftsmanship**

To manufacture each instrument with utmost care, skill and professionalism.

#### **4. Customer Commitment**

To establish long-term, trusting and transparent relationships with each client.

#### **5. Integrity**

Honesty in business, adherence to ethical principles, and keeping our promises.

#### **6. Continuous Improvement**

Learning, improving, and evolving at every step according to global standards.

# SURGICAL

Our extensive line of Surgical Instruments

Many designed in conjunction with Key Opinion Leaders, provide the absolute precision and performance required in dental surgery. By combining handcrafted artistry, innovative technology, utilizing proprietary materials and processes and through extensive quality controls, our instruments are crafted to the highest quality standard, enabling clinicians to deliver the best possible outcome for their patients every time and be The Best in Practice.

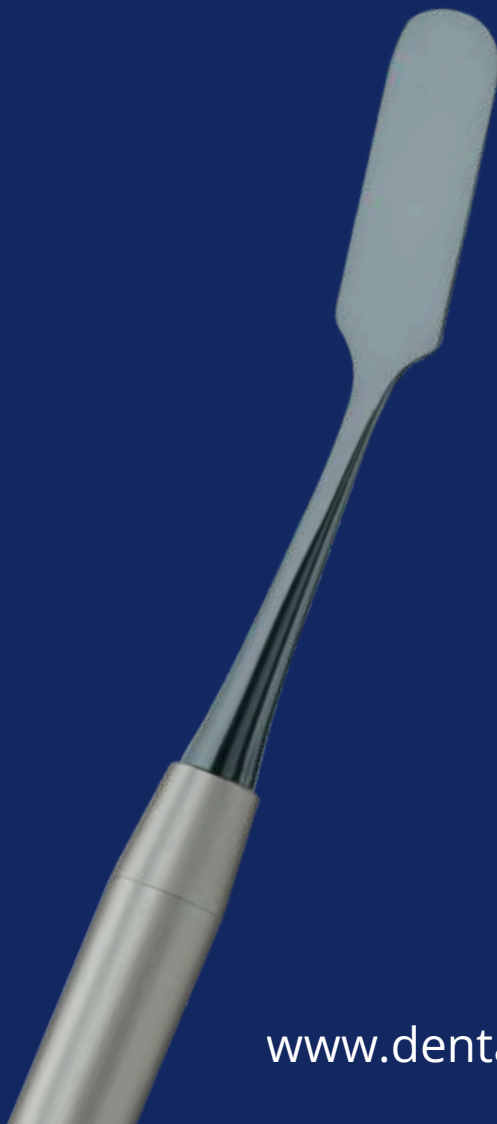

## SURGICAL BLACK LINE

Designed for performance,

The Black Line is engineered with Aluminum Titanium Nitride to optimize clinical outcomes by delivering efficiency throughout the entire surgical procedure. From reducing light reflection to enhancing visibility at the surgical site, the Black Line was designed with the clinician in mind. In addition to the surgical hand instrument portfolio, the Black Line now includes 7 Super-Cut scissor designs delivering superior performance through enhanced precision and innovation.

### BLACK LINE SURGICAL HAND INSTRUMENTS

Performance engineered coating for a harder, smoother surface for optimal edge retention and enhanced lubricity

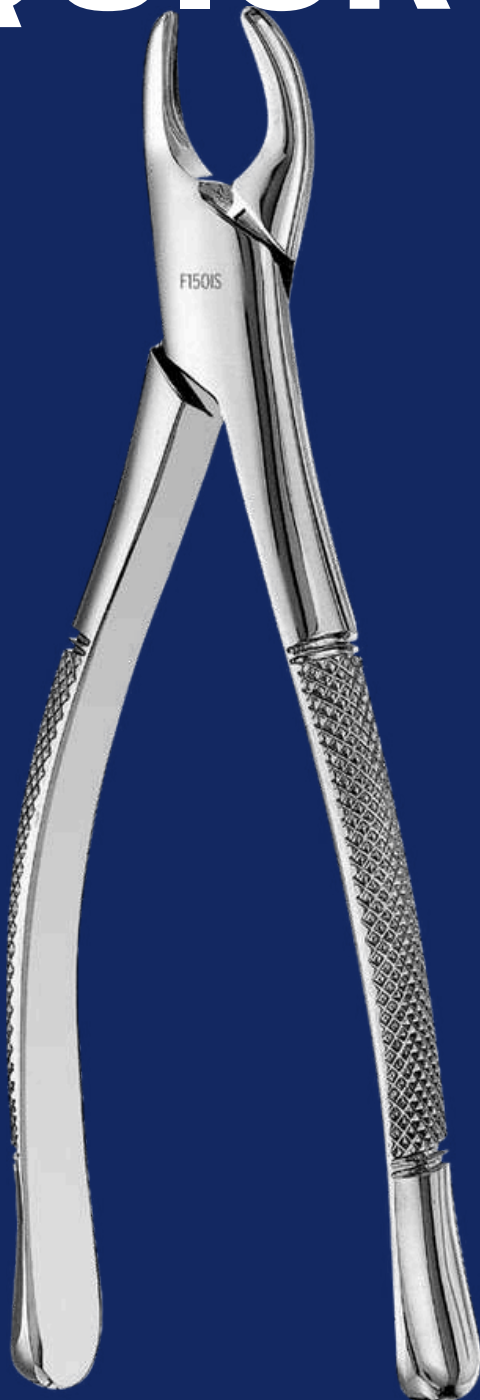

Reduced light reflection afforded by a matte finished handle and black working ends

Unique, smooth, large diameter lightweight handle for maximum comfort, reduced hand fatigue and increased control

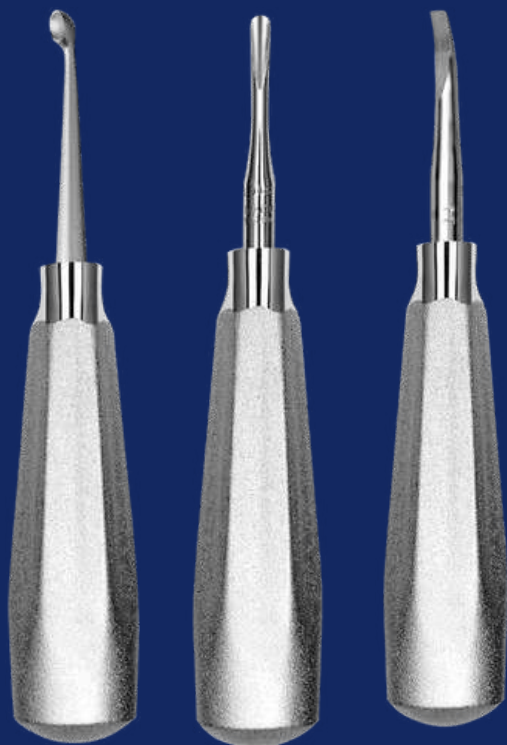

Handcrafted with Immunity Steel® Alloy for optimal strength and corrosion resistance

# HOW TO ORDER QUICK GUIDE:

1. **Select product SKU & description**
2. **Contact us via WhatsApp/Website**
3. **Make payment**
4. **The product will be shipped to your address**

## Extraction Forceps Reference Forceps Beaks

The beaks of extraction forceps are anatomically designed to adapt to the tooth at or below the cervical line. Therefore, beaks are either conical, bifurcated, or trifurcated in order to adapt to the tooth or furcations. Many beaks are serrated, which offers additional grasp when extracting teeth.

Conical

Bifurcated

Trifurcated

Serrated

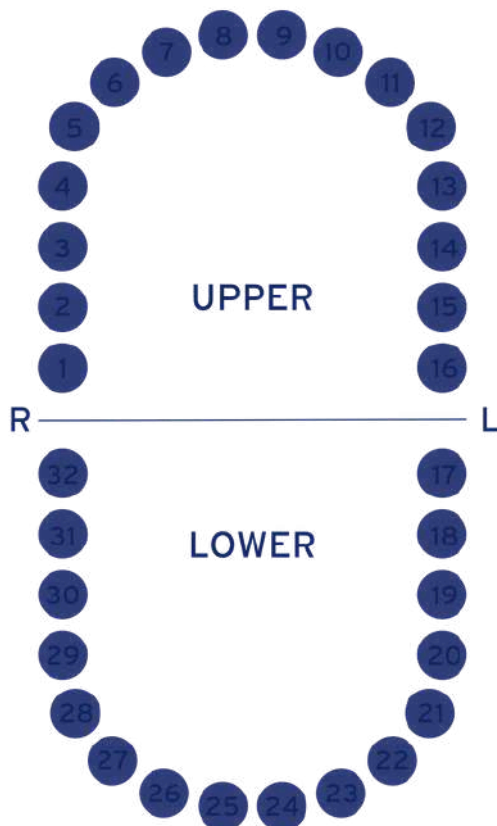

### Care of HuFriedyGroup Forceps

To maintain proper function and appearance, the following points should be adhered to:

- Clean and sterilize in an open position.
- Clean and thoroughly dry forceps before wrapping for sterilization.

### Important

- Lubricate with Instrument Lubricant after cleaning and before sterilization to ensure smooth working action.
- Use ShineRenew wipes to correct hard-to-operate forceps. Rust spots or sediment can be wiped off, as they do not penetrate the surface.
- Do not allow forceps to remain in water or steam moisture for long periods.
- Keep forceps away from strong mineral acids and fumes.

### Find Your Forceps

Unsure of which forceps to use?  
Use our Find Your Forceps online tool to easily determine which forceps are used on any given tooth.

Find Your Optimal  
Extraction Forceps.

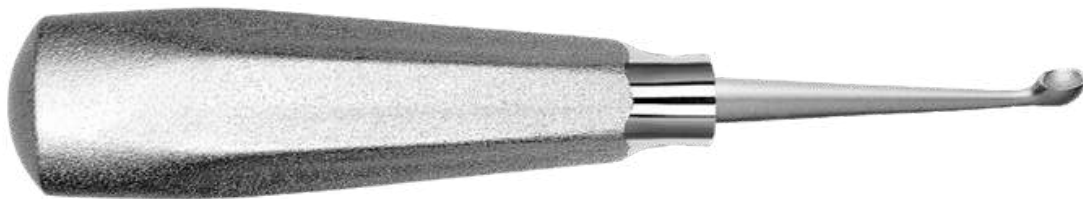

## Grafting Instruments

Grafting Instruments are meticulously handcrafted with consistent and precise dimensions using the finest grade stainless steel, ensuring easy transport and condensation of graft material at the surgical site.
